Catherine Walsh

If I were mayor I would change all the kids who are hungry in Burlington. I would also give Project Crayon a little or big donation! Project crayon is a Program the F&M bank and Trust does. They give school supplies to every school in Burlington and Mediapolis. I would also try to get all the sick families off the street.

Another thing I would do if I were mayor is that I would try to get all the bad people out of Burlington like the gangs, drug dealers and shooters because If were to have kids I wouldn't want my kids in an environment like some of the scary places in Burlington. Then again everywhere you go there are going to be bad people. The only reason I know about all these bad things is because of the newspaper and friends.

If I were Mayor I would also build another high school because there are only two, Burlington High School and Burlington Notre Dame. There are more and more kids coming into Burlington because their parent's jobs or whatever else brings them to Burlington. I also think that Burlington needs more attractions. like a big water park or something like that. And those are the changes that I would make in Burlington.
